

Structural parameters of the electricity grid

In accordance with the disclosure requirements pursuant to section 10 of the StromNEV and section 23c (1) of the EnWG, parameters of the electricity grid must be published on the Internet on 1st of April each year. These are shown in the following overview:

Network Figures 2022

1. Circuit length in km

	Cable	Overhead Line
Total	248	12

2. Installed electrical output of the transformer levels in MVA

TOTAL	697 MVA
-------	---------

3. Annual electrical energy obtained in kWh

TOTAL	3.334.979.000
-------	---------------

Grid losses

Quantity in kWh	Average procuring costs in ct/kWh
80.039.496	12,54
